

Because The Secretary of State Prohibits Independent Audits **The Nevada Election System Is Untrustworthy**

Banks, Financial Institutions, Government Agencies, Small Businesses & Corporations Are Mandated To Have Independent Audits—Why Not Nevada Secretary of State?

Is it not true that:

- Self-audits are easily corrupted & public reports of their findings are **self-serving**?
- Public Election Ballots are **more valuable than money**, & no one would want to place their money in a bank account that was not independently audited?
- The 3 election elements (**registration, voting & ballot counting**) use unsecure electronic machines, uncleared persons & are known **targets for all types of fraud**?
- Independent Audits Will:
 - * reveal when recounts are needed to verify elections,
 - * deter internal & external fraud,
 - * provide for continuous improvements in elections, &
 - * promote public confidence in election results?
